BOOK 2  
FEB 16 1977

In playing primitive  
wind instruments  
the players play until  
out of breath. Then  
regain their breath.  
There doesn't seem to  
be any attempt at  
breath control.

Science as mythology  
again.  
Extremely fertile

Its getting so if you  
cant afford to  
be poor any more.

Some people really  
think degrees are import-  
ant. Some guy was  
asking Lorene how it  
felt to be so close  
to getting a degree, as  
if it were one of

the most important  
goals of human exist-  
ence. He was almost  
in awe. It was the  
paper, not the  
knowledge.

If you build a structure  
of wood without  
nails or glue, you  
have an integral  
structure. Much  
stronger in earthquakes.  
Nails and glue  
are to stick together

moments of force that  
are not structurally  
sound.

The Quonset Hut maybe  
the most decriable  
structure of western man.

300 pyramids in Egypt  
60,000 " in Mexico, etc.

3 pyramids in Mexico  
are larger in volume than  
any in Egypt.

Least cut.

Why would the Mayas  
abandon their temples  
every 26-52-104 etc.  
years.

They're still making  
buildings that a  
rational mind might  
question in a  
seismic area like

how did clothes come along

I never used to see the  
value in community.  
I had to work out some  
stuff alone. I  
might even join a  
unitarian church.  
I used to see this as a  
weakness. That's as  
silly as the opposite.  
Why label the  
desire for community.

No matter where

you are.

Is theater "really"  
more interesting than  
life. If so, why?  
I wonder if ever  
there was a crime  
solved elegantly and  
~~properly~~

A good interrogator  
must engage the person  
in conversation.  
get him pissed off,  
emotional.

The best recourse  
is silence.

I was at the landrumst.  
I overheard the old  
lady that works there  
talking to a regular  
customer. They  
were enjoying an "intimate"  
conversation about  
the color of something  
and how she'd  
cut her hair and  
the other one didn't  
recognize her.

Maybe that kind  
of talk is really  
important and

satisfying to them.  
It seems so pointless  
and ? to me.

But I enjoy small  
talk myself. But  
somehow when I  
do it, it's different.

If that kind of  
talk is really important  
to them (is all there  
talk) then there's  
no way for us to  
talk. If it's a  
coverup, then there's  
something going on

underneath that I  
can relate to.

Should I go  
hedging? That  
can be painful.

It's such a dissa-  
ppointment to be  
a starving prospector.

I'm a starving  
prospector

A lot of these people  
I think are very  
shallow have probably  
experienced shit a  
much heavier than  
I have. How can  
I call them shallow.  
Maybe they're just stupid.

Sometimes I think  
the entire universe  
conspires to keep me  
awake and alive. ~~to~~

Will it pay or  
Who will it pay

It's not that there are  
indeed more than  
3 dimensions. "Dimension"  
is a concept a  
reality of the 2<sup>nd</sup> order.  
Dimensions are  
constructs, like

the equator. You  
can't just impose any  
construct on reality.  
A spinning sphere  
can have only one  
equator. But  
lines of longitude or  
latitude can be  
distributed in many  
ways. The idea of  
time as a 4<sup>th</sup> dimension  
arose only from the  
disturbing experimental  
results that verified  
relativity. Perhaps

there is a multidimensional  
reality - maybe not.  
It may be that 4 are  
all that's required  
to explain phenomena  
we experience.
